

BROAD STREET SHIFTED EAST w/ EXISTING POWER LINES

Site Analysis B

TRAFFIC

PEDESTRIAN

BUILDING MASSING

COMMERCIAL

- Features:
- Forest Street as primary (alternate) commuter route, connecting Main Street to Baker Street.
 - Pedestrian connection between the site and Main Street via intersection of Forest and Broad with access to Mill Creek Park across center of site (under existing power lines.).
 - Retail/ Commercial space along Broad street, extending the direct pedestrian connection from Main Steet into the site, and south along Forest street into the future Village Commercial area.
 - The jog of Broad Street approaching Grand Street creates a pedestrian friendly transition from proposed commercial on site to future Village Commercial along Grand Street.
